offering a truly global perspective this book serves as a road map for service learning partnerships between information science and nonprofit organizations it introduces for the first time an essential framework for service learning in cis addressing both the challenges and opportunities of this approach for all stakeholders involved faculty students and community nonprofit organizations npos both domestic and abroad this volume outlines numerous examples of successful programs from around the world presenting practical working models for implementing joint projects between npos and academia

a joint publication with educational development center and bank street college of education

this book describes the cognitive and interpersonal effects of group model building and presents empirical research on what group model building achieves and how further it proposes an integrated causal mechanism for the effects on participants there have been multiple previous attempts at explaining the effects of group model building on participants and this book integrates these various theories for the first time the causal mechanisms described here suggest a variety of design elements that should be included in group model building practice for example practitioners typically try to reduce complexity for clients to make the process feel more accessible in contrast the findings presented here suggest that the very act of muddling through complexity increases participants affective commitment to the group and the decisions made the book also describes implications for theory and practice system dynamics has traditionally been interested in using technical modeling processes to make policy recommendations group model building demonstrates that these same techniques also have implications for group decision making

as a method for negotiating agreement the book argues for the value of group model building as a mediating or negotiating tool rather than merely a positivist tool for technical problems
